

# Gratnells

Sort ED

GRATNELLS  
ANTIMICROBIAL  
SYSTEM

## The latest in tray inserts

A range of inserts designed to be flexible and useable in shallow and deep Gratnells trays. Inserts can accommodate a variety of parts and spares for robotics and coding STEAM activities and enable division of a Gratnells tray to between 2 and 8 sections.

SortED inserts are also useful in early years for easy deployment of resources throughout the classroom reducing set-up and take-down time.

In a Gratnells deep tray, small, medium and large inserts hold a myriad of small parts. The large insert can be used to hold longer components in the top of the tray or small and medium size inserts in many combinations. The SortED large insert is easily lifted out of the tray thanks to the useful finger and thumb section. Gratnells SortED inserts are the ideal solution for STEAM kits of all types.

### Features:

- Divide Gratnells trays from 2 to 8 sections
- Store large and small parts
- Easily create two levels of storage in deep trays
- Compatible with shallow and deep trays
- Deploy parts and components easily in the classroom
- Nestable components
- Injection moulded for strength
- Made from 100% recyclable polypropylene
